

DIGITAL MUSIC STORE ANALYSIS

BY SHIVAM GIRI

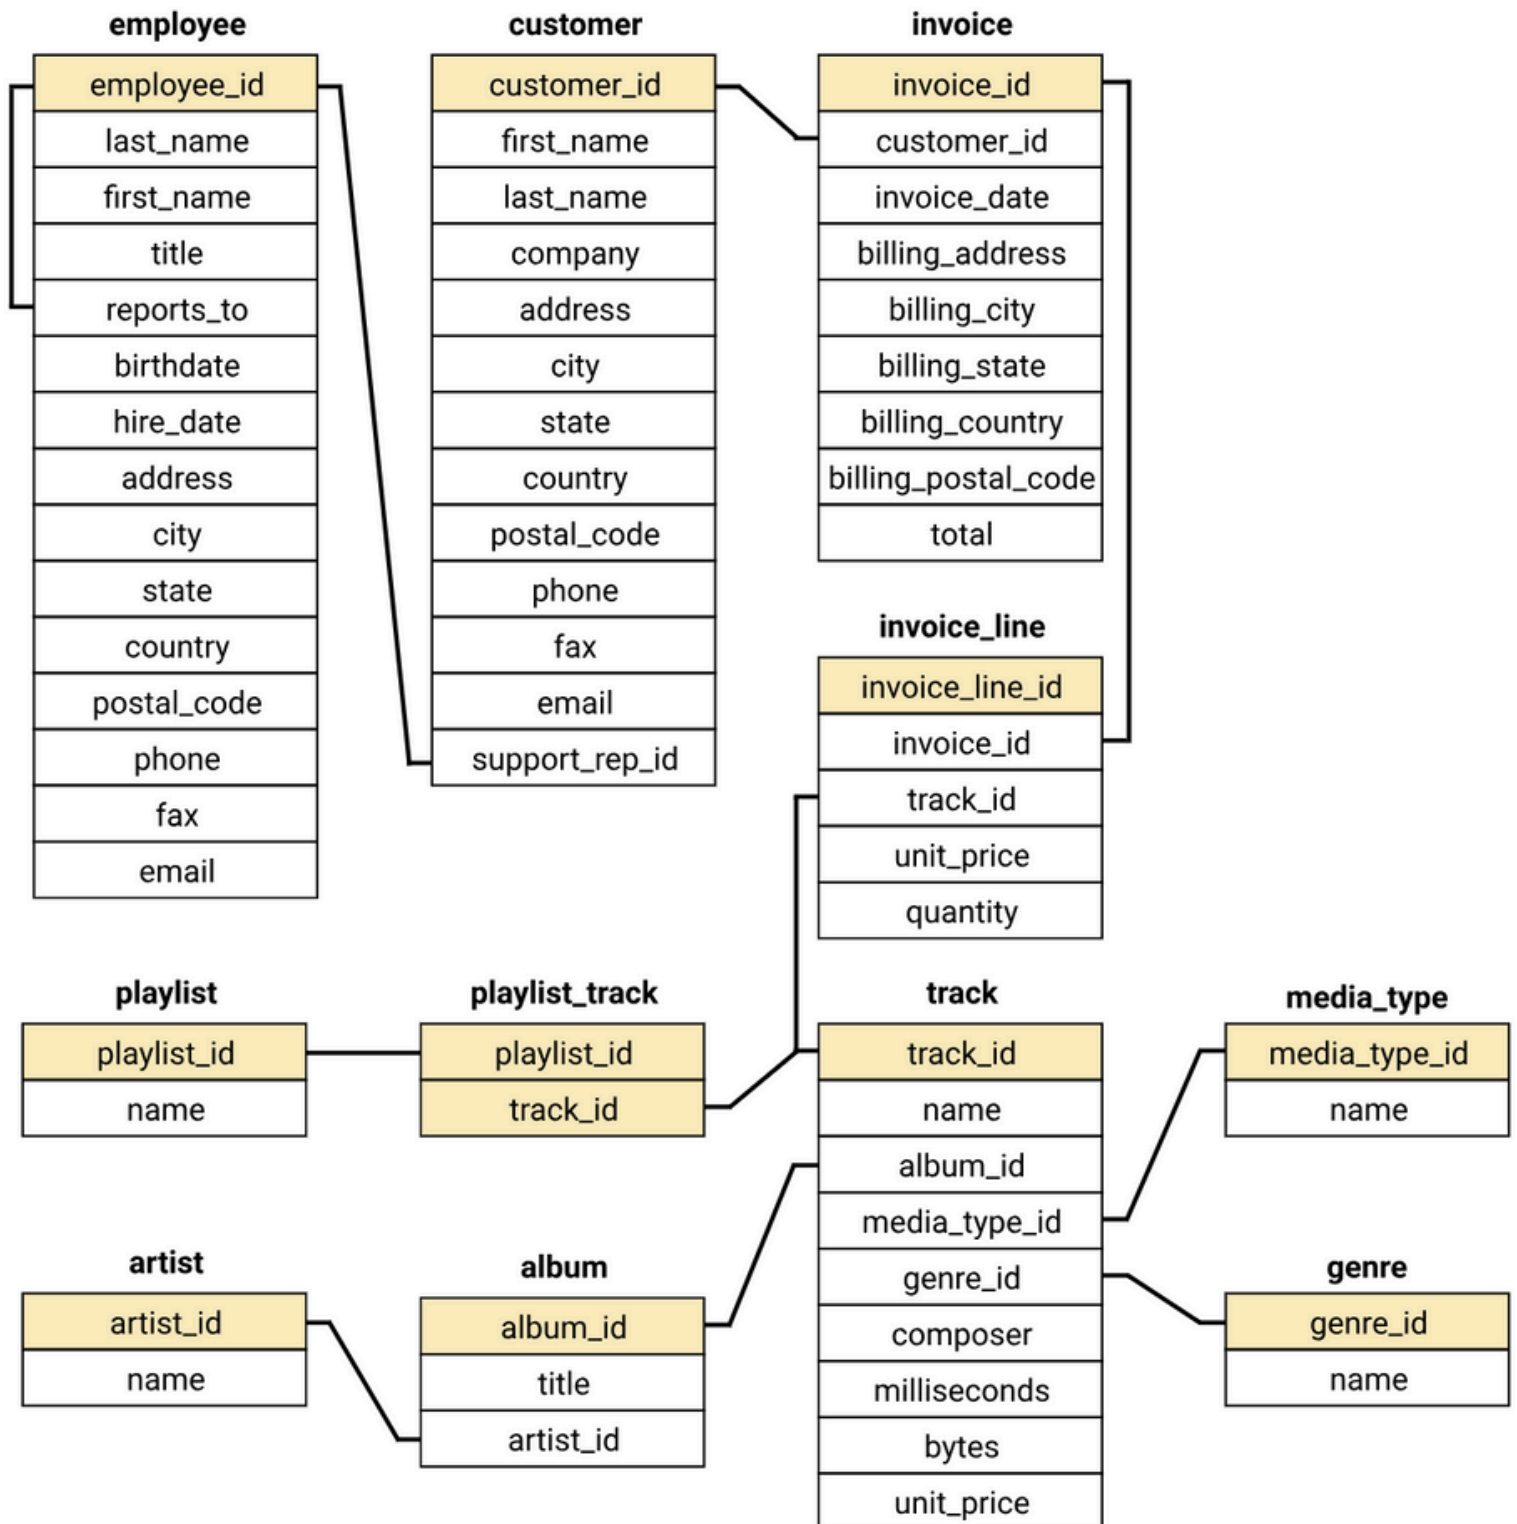

Objective

This beginner-friendly project is ticket to dissecting the music playlist database like a pro! Dive into the data using SQL, and unlock secrets that will guide the store's journey to business stardom with some easy-peasy questions.

Keeping things casual because why not—it's just a practice run!

Schema Diagram

Data Overview

- This dataset is a subset of Yelp and has information about businesses across 8 metropolitan areas in the USA and Canada.
- The original data is shared by Yelp as JSON files.
- The five JSON files are business, review, user, tip and checkin.
- The JSON files are stored in the database for easy retrieval of data.

Analysis & Findings
